7. Health & Safety Policy

1. INTRODUCTION

As a responsible employer, it is our duty to bring our COVID-19 guidelines and any revisions made to this document, to the attention of all the employees.

All employees will receive a personal copy of the COVID-19 guidelines.

2. STATEMENT OF POLICY

It's the policy of Richco International to provide and maintain safe and healthy working conditions, equipment, and safe systems of work for all my employees and to provide such information, training, and supervision as they need for this purpose. I accept my responsibility for the health and safety of other people who may be affected by our activities.

The allocations of duties for safety matters and the arrangements that I will make to implement the policy are contained within the arrangement section of this document.

The policy will be kept up to date, particularly as the business changes in nature and size. To assure this, the policy, and the way in which it has operated will be reviewed at the beginning of each year.

3. RESPONSIBILITIES

3.1. President, Mr. Richardson has overall and final responsibility for the health and safety performance in the company. He is responsible for:

- Providing sufficient resources to enable arrangements within the Health, Safety and Welfare Policy to be implemented.
- Ensuring that appropriate insurance cover is maintained to satisfy both statutory and business needs.
- Supporting management and employees in the implementation of all aspects of this Health, Safety and Welfare Policy and supplementary safe systems of work.
- Ensuring that trained, competent persons only are employed by the Company.

3.2. President - Mr. D Richardson is responsible for:

- Ensuring that the objectives of this Health Safety and welfare policy are fully understood and implemented by all supervisors and employees of the Company.
- Ensuring that sufficient supplies of suitable safety equipment are available.
- Ensuring that Health Safety & Welfare is the priority on all development sites.
- Ensuring that by inspection, statutory records in relation to weekly inspection of all equipment (including hired) subject to mandatory Company inspections are maintained.
- Ensuring that site arrangements exist via site management for the executive communication to all site employees in all matters pertaining to health safety and welfare.
- Ensuring that effective systems are in place for the communication to all site employees in relation to COSHH, Risk, Manual Handling Assessments, CDM and CDC requirements and other matters relating to safety i.e., results of safety audits and inspections.
- Ensuring that injuries sustained to persons under his control receive prompt first aid, entries are recorded in the Accident Book and that Mr. Richardson is informed, in all cases other than minor.

3.3. Employees The Employees of the company consist of managers, office staff, tradesmen, and laborers. All employees are responsible for:

- Their own safety and the safety of others who may be affected by their acts or omissions.
- Wearing personal protective equipment.
- Co-operating with their employer in the discharge of his Health and safety duties.
- Reporting accidents, injuries, defective equipment and understanding that they must not interfere with any item provided for safety purposes.

4. ARRANGEMENTS

The Company's established 'arrangements' for ensuring the health Safety and welfare of employees are augmented by 'safe systems of work'.

4.1 The Control of Substances Hazardous to Health Regulations (COSHH)

The object of the COSHH is to protect the health and safety of persons exposed to substances hazardous to health in the workplace. Assessments are to be completed in respect of the scope of the Company's operations.

4.2 Noise at Work

Noise at Work is the preservation of persons hearing by the assessment of noise exposure. Resulting from assessment of noise emitting tools and equipment, findings of up 85 bdA will be interpreted as 'optional' wearing.
Over 85 dbA will be 'recommended'.
Findings of 90dba will necessitate mandatory wearing of issued protection, the display of approved warning sign and initiating procedures to attempt to eliminate noise hazards at source.

4.3 The Management of Health and Safety at Work

The Management of Health and Safety at Work require employers to protect anyone from harm because of anything which is done in connection with their business. For each site, areas of risk will be identified as an action plan developed by the Contracts Manager. Such plans, on completion, will be recorded and findings will be communicated to employees.

4.4 The Manual Handling Operations

Manual handling operations which may cause injury at work will be identified by the risk assessment carried out. They will include not only the lifting of loads, but also lowering, pushing, pulling, carrying, or moving them, whether by hand or other bodily force. The Company will record such assessments where applicable.

4.5 The Personal Protective Equipment at Work (PPE)

To set out the principles for selecting, providing, maintaining, and using PPE. The Company will:

- Give adequate information, instruction, and training on its use.
- Provide storage for PPE. When not in use.
- Ensure that PPE is properly used.

Suitable and sufficient PPE is stored and is free issue to employees, i.e.:

- Disposable dust masks
- Abrasive protection gloves
- Impact resistant goggles
- Safety helmets
- Safety footwear

4.6 First Aid

First Aid boxes will be carried in all Company vehicles. The location of First Aid boxes on sites will be by notice prominently displayed. Employees will be encouraged to take First Aid Training.

4.7 Fire Protection

Fire extinguishers to suit the material at risk, will be positioned at the exit and emergency exit points. All Company vehicles will carry a suitable extinguisher, the Contracts manger will arrange suitable training for employees to enable them to use the equipment in an efficient manner meet the risk.

4.8 Construction (Design and Management - CDM)

As principal Contractor, the Company will take account of the specific requirements of a project when preparing and presenting tenders or similar documents. Take over and develop the health and safety plan, co-ordinate the activities relevant contractors and sub-contractors and ensure they comply with relevant health and safety legislation and with the developed health and safety plan. In addition, they will ensure the provision of information, training and consultation with employees including the self-employed.

4.9 Safety Induction and Subsequent Training.

All employees shall be inducted on the dangers that apply to that particular place of work, the site rules will be discussed, and agreed Fire procedure, escape routes, location of extinguishers and Fire Assembly Point will be established.
All site employees will sign the register on completion of the induction program.

4.10 House Keeping - Access/Egress.

It is essential that all employees keep their workplace in a safe and clean condition. All waste material must be removed from the workplace to prevent it becoming an additional hazard. The disposal will be subjected to environmental awareness.

4.11 Contracts and Visitors.

All sub-contractors and visitors are required to wear the appropriate protective clothing, i.e., substantial footwear and safety helmets. All visitors are accompanied on site and contractors are obliged to work to SITE RULES.

4.12 Environmental Awareness

It is the intention of the Company to carefully manage all activities to reduce any potential environmental effect to a practical minimum. All staff are encouraged to demonstrate a continuing commitment to environmental performance as well as compliance with all statutory requirements for environmental protection.

5. SITE RULES

5.1 General Site Safety Rules:

1. Inform Mr. Richardson of any disability or illness that may affect your actions. (Color Blindness, Epilepsy, Diabetes, Vertigo, Claustrophobia, Deafness etc.)
2. You must not report for work under the influence of alcohol or drugs or take any drug during working hours. If you have any prescription drug that you must take, please let Mr. Richardson know.
3. You must report and record on the Richco accident form any injuries that occur on site. First Aid will be given by the onsite First Aid Attendant.
4. All accidents will be investigated by Mr. Richardson. A copy of the report will be sent to the Principal Contractor of the site.
5. Any unsafe condition that you are ware of must be reported immediately to Mr. Richardson.
6. All Safety Sign instructions on site must be always complied with.
7. Waste material and debris must be cleared up as work progresses.
8. Welfare facilities must be maintained in a clean and tidy condition.
9. You must be responsible for your own actions. Always be sure that you are following set procedures and are aware of risks involved in any work activity and any other persons that your actions may be affecting.
10. Do not be afraid to ask if you are unsure on anything.

5.2 Personal Protective Equipment (PPE):

- All Items of PPE will be issued by the Office upon receipt, they will be signed for. You have a legal duty to use and take care of any PPE you are issued with. If you need equipment replaced ask!
- Most sites are defined as Hard Hat sites and head protection must be worn. We will try to obtain permission to rescind this rule for workers whilst working on the Roof. If this cannot be arranged, then you must comply (Any offender will be disciplined). You will be issued with a hard hat that must be kept clean and checked for damage on a regular basis.
- Safety Footwear must be always worn on site. If you have none from a previous site, then you will be issued with new ones. Trainers and lightweight shoes are not allowed in the work areas.
- Further PPE will only be issued as required after assessments have been carried out on the risk that you are being exposed to. If you identify an area that you feel has been overlooked than you must inform Mr. Richardson.

5.3 EQUIPMENT AND PLANT:

- Safe use of ladders. All ladders are to be used with care. Ladders are to be used as a means of access. They should be secured or if not secured they should be footed until they can be secured. Tools and materials should not be carried whilst climbing or descending a ladder.
- All scaffolds will be erected by authorized scaffolders. Any scaffold erected for your use must be suitable for the task you have to do. If you consider any scaffold unsafe you must inform Mr. Richardson immediately. Never alter the position of any Guard Rail, Toe Board, Platform, Hop up or Scaffold Tie. (Disciplinary action will be taken against offenders).
- All trestle scaffolds will be constructed under the instruction of a supervisor. The method statement will state the maximum height of the working platform, where and when they can be used.
- No one will operate or use any plant or equipment unless trained and authorized by Mr. Richardson.
- Ensure that all plant and equipment that you are using are in good condition and fit for the job that is being undertaken. Plant and equipment operators are responsible for understanding the operating requirements of the plant and equipment they are using. If there is any doubt - ASK.
- Equipment and plant must be immobilized when left unattended.
